

Position your
Oil Business for Growth with

**Interswitch
Energy**

Enjoy Accountability, Transparency and Profitability

IN THE DOWNSTREAM SECTOR

Oil business should be good business.

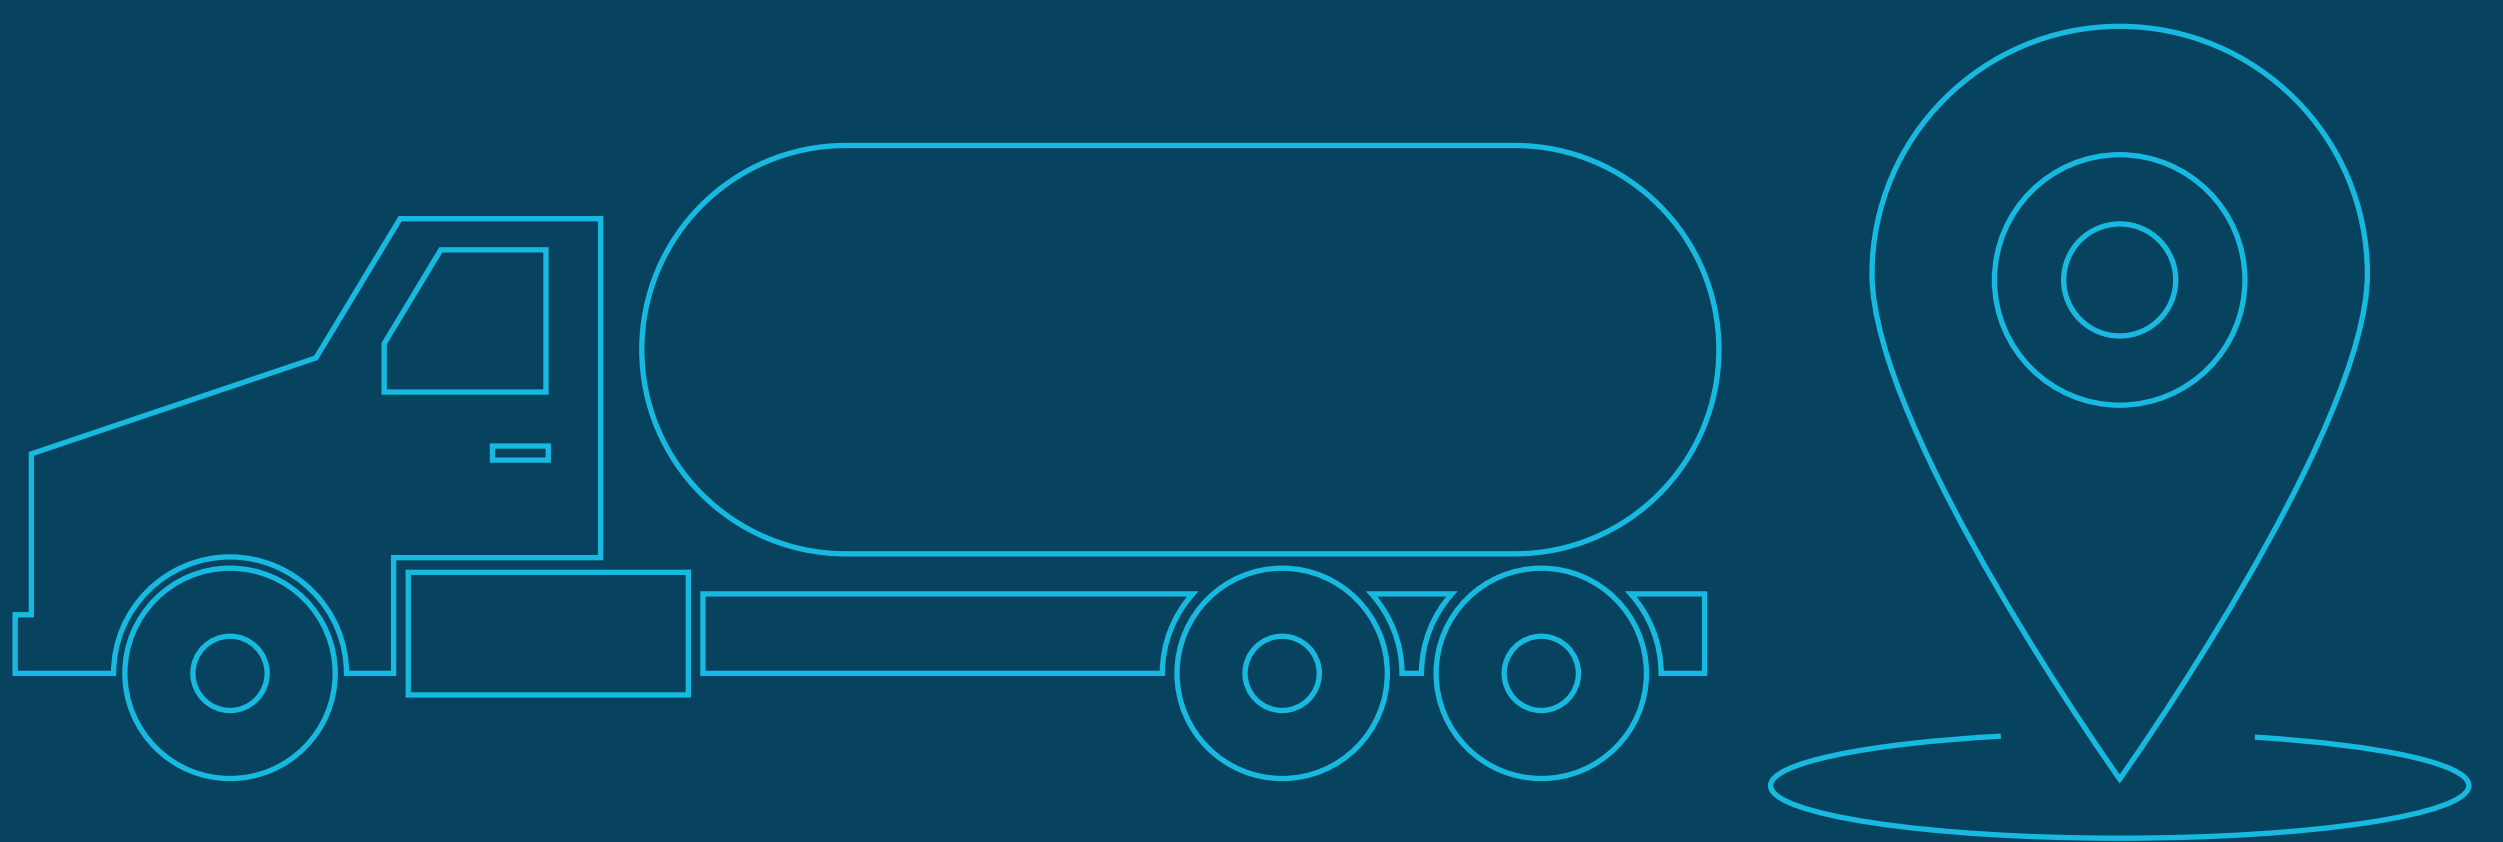

However, revenue leakages, inefficient inventory monitoring processes and payment loopholes could be robbing you of profit and stagnating your organisation's growth.

Interswitch Energy introduces easy tracking and operational transparency to your business, providing a reliable oil and gas supply chain solution that delivers a digital experience end to end, from payments, to procurement, distribution management and supply chain.

Consumers also enjoy improved services at your outlets, without the risk of waste or fraudulent practices.

The automated self-service option ensures guaranteed correspondence between the amount paid and the value received.

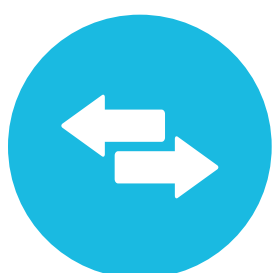

Interswitch energy is the bridge to a sustainable and profitable oil and gas business, offering you impactful benefits, including;

Interswitch Energy puts you firmly in control of your downstream business, enabling seamless monitoring of all transactions across your multiple outlets, online, in real-time. It helps you create a single ecosystem regardless of how many branches you operate or how large your fleet is.

Smart Fuel offers a multichannel payment system to your customers that guarantees your business prompt and seamless settlement and reconciliation.

Smart Fuel enables self service with multi-mode operations which allows you to switch between operation modes as it suits your business. It also offers your customer and staff convenience, as you can sell your products 24/7 without recruiting staff that would work night shift.

Smart Fuel equips you to stay on top of your business and make informed business decisions inspired by timely and comprehensive reports, analytics and inventory levels real-time, anytime.

SMART ENERGY FOR YOUR CUSTOMERS;

Forecourt Automation

Interswitch energy is embedded with the Interswitch payment gateway that enables customers to pay at the pump using any payment instrument or channel of their choice- cash, Verve, Mastercard, Visa, Paycode, USSD, QR Code, wallet, or from a banking app and other tokens they already have.

Self Service Mode

This mode empowers customers to pay at the pump, fuel their tanks themselves and get complete value at their convenience.

Loyalty Incentives/Offerings

You can offer your customers incentives and loyalty programs when they satisfy the terms and conditions and qualification criteria for such programs.

Be among the first to introduce self Service and other digital solutions to Oil and Gas retail operations and activate a new level of customer acquisition, loyalty and revenue flow.

Round The Clock Support

FROM YOUR TECHNOLOGY PARTNERS

The best part is we won't leave you to it. We'll hold your hands with round-the-clock support and on site training for your staff to aid easy adoption of the simple processes and automated systems.

At Interswitch, our goal is to leverage over 18 years of ground-breaking payment and digital innovation to deliver improved services that benefit every stakeholder in the energy value chain; by providing support you can count on in a scalable manner that ensures that regardless of how quickly your organisation grows, you are able to sustain processes and maintain efficiency.

We provide technical, operational, reporting and customer support via a dedicated team of payment experts and an infrastructure that aligns with Global Security Standards.
